“THE SOURCE LEGACY WORKBOOK”

PUBLISHED

by authors **RON BROWN GRAYSON** and **SHELLEY OLIVER**

(Rio Rancho, NM) — Authors Ron Brown Grayson and Shelley Oliver announced today that their book *entitled “The Source Legacy Workbook”* has been published and is now available for purchase nationwide.

“*The Source Legacy Workbook*” is a powerful and authoritative must-have compendium for spiritual life in the new millennium. Spawning worldwide study groups even in pre-publication, this challenging, affecting, and inspirational *work* book provides a uniquely American perspective on spiritual responsibility, and places America at the epicenter of the Spiritual Renaissance. “*The Source Legacy Workbook*” is both a book and a *textbook*, providing over forty clinically tested and proven processes designed for core level healing.

Ron Brown Grayson and Shelley Oliver are co-founders of the Source Legacy Foundation and the School Of Universal Resonance & Creative Empowerment (S.O.U.R.C.E.), a non-profit educational organization located in Rio Rancho, New Mexico. The Foundation and School are dedicated to the belief that we, as human beings, are divine in origin and hold within us the innate wisdom necessary to create self-healing, balance, joy, and abundance in our lives. “*The Source Legacy Workbook*” is structured in part after the school’s deeply tool-based educational programs, and offers proven techniques and processes to facilitate the activation of this internal wisdom – wisdom that is the birthright of all human beings.

Mr. Grayson and Ms. Oliver are teachers, lecturers, counselors, writers, ministers, and facilitators of self-healing. Their very practical and tool-based work dynamically illuminates one basic idea: “God is simple.” So, too, are the tools that God has provided for our use.
